--- SEE OFFICE ACTION ON THE FOLLOWING PAGES ---

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to ELECT A SINGLE SPECIES to which the claims must be restricted.

2. Species 1, claims 1, 2 and 5-21, drawn to protein A, methods of cell culture and abnormal placental function comprising use of protein A.

Species 2-5, claims 1, 2 and 5-22, drawn to proteins B, C, D and E.

Species 6-8, claims 1, 3 and 5-22, drawn to proteins F, G, H.

Species 9-27, claims 1 and 4-22, drawn to each of the 18 species of sequences 1-8, 12-18, 20-22 and finally human apolipoprotein A-1.

Note that claims 1 and 5-21 are generic to all 27 species and will be examined regardless of which species is elected.

3. The 27 species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The first product, protein A and the first method of making and first method of use of protein A are a single inventive concept because they share the special technical feature of Protein A.

Each of the remaining proteins lack the same special technical feature because each protein has unique chemical properties and requires different steps to make and are used in methods with different reagents and results in different end products.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 C.F.R. 1.821(a)(1) and (a)(2). See Table 2 on page 40. However, this application fails to comply with the requirements of 37 C.F.R. 1.821-25 for the reasons set forth on the attached Notice to Comply With Requirements For Patent Applications Containing Nucleotide And/Or Amino Acid Sequence Disclosures. In responding to this Notice, Applicant is requested to return a copy of the attached Notice to Comply.

IN THE INTERESTS OF COMPACT PROSECUTION, AN ACTION ON THE MERITS HAS BEEN ISSUED. COMPLIANCE WITH THE SEQUENCE RULES, 37 C.F.R. 1.821-25, IS
